

## SILVERTON COMMUNITY POOL LEVY

### BALLOT MEASURE 24-424

In 2003 the voters of Silverton passed a 10 year bond for \$1.2 million to complete improvements to the Silverton Community Pool, which was originally constructed in 1939. That bond resulted in a new bathhouse, improvements to the pool itself, and the installation of a zero-depth entry on one end. In 2013 the voters of Silverton passed a 5 year bond for \$1,375,000 for the operation and maintenance of the pool which was a levy of \$0.45 per \$1,000 of assessed property value. That 2013 measure expires June 30, 2018.

The City of Silverton Public Works Department is responsible for maintaining the Silverton Community Pool Facility. If Measure 24-424 passes a 5-year extension of the existing pool levy, would be assessed on all properties within the City limits. Please see the other side of this flyer for frequently asked questions regarding this ballot measure.

**If ballot measure 4-424 passes:**

**How much revenue would the levy generate?**

- The proposed pool levy extension would generate approximately \$275,000.00 per year based on the most recent property value assessments.

**How would the revenue be collected?**

- The City would self-administer the levy which would result in a \$0.3659 per \$1,000 of assessed property value, or approximately \$73.18 a year for a home with an assessed value of \$200,000.

**What would the funds be used for?**

- The replacement of the existing removable cover.
- The replacement of HVAC equipment.
- The resealing of joints in the pool.
- The removal and replacement of the existing pool tank paint.
- The geotechnical investigation and design of a creek bank stabilization system adjacent to the pool facility.
- Standard operation and maintenance costs associated with operating a year-round pool facility.
- Additional long-term maintenance projects identified in the 2016 Pool Facility Analysis Report.

**What would happen if the measure does not pass?**

- The City will not have the necessary funds to operate and maintain the pool facility on a year-round basis.
- Critical pool facility maintenance projects will not have adequate funding.
- Unfunded maintenance items could result in facility system failures, necessitating the closure of the pool facility for an extended period of time.
- The existing levy would expire and annual property tax rates would be reduced by the amount of the current levy (\$0.45 per \$1,000 of assessed value).
